Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. The current application filed on September 29, 2003 is a divisional of 10/009,962, filed January 23, 2002 which is a 371 of PCT/JP00/03806 filed on June 12, 2000, which in turn claims priority to Japanese application, 1999-167439 filed on June 14, 1999.

Information Disclosure Statement

2. The information disclosure statement filed September 29, 2003 has been considered. Please see the attached initialed PTO-1449.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 5 and 6 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well-established utility.

The specification is devoid of any discussion of what the partial sequences would be used for. While, generally speaking, DNA fragments may be used as probes for detecting other DNA, this is not a utility specific to SEQ ID Nos.: 1 and 3 because any

Art Unit: 1653

partial nucleic acid prepared from any DNA may be used to as a probe in the preparation and or identification of a full-length piece of DNA.

Claims 5 and 6 are also rejected under 35 U.S.C. 112, first paragraph.

Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Albrandt et al.

Bases 185-188 of SEQ ID No.: 1 of Albrandt et al. are identical to bases 1-4 of applicant's SEQ ID No.: 1; bases 666-669 of SEQ ID No.: 1 of Albrandt et al. are identical to bases 1-4 of applicant's SEQ ID No.: 3. Since the partial sequences are not limited in any way as to size or sequence they read on any fragment. Thus, Albrandt et al. clearly anticipates the above claims.

Conclusion

7. Claims 1 and 2 are allowed.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Wax whose telephone number is (571) 272-0623. The examiner can normally be reached on Monday through Friday, between 9:00 AM and 5:30 PM.
